HUFFLE PACKAGING

How can we help you?

PACKAGING

Huffle Packaging has provided a new perspective into the cardboard packaging sector

by sharing with its clients the quality of the true printing developed by the integration of Huffle's advanced technological infrastructure and qualified staff within the framework of "Huffle production and service principle and the cost advantages in manufacturing provided by the production conditions.

- Cardboard or PVC/PET with 7 Color UV and conventional printed cardboard boxes.
- Various food and fast-food packaging produced with specially laminated, suitable for food paper and cardboards.
- Labels produced with paper or PVC/PET.
- Cardboard stands for sale and display.

WEB OFFSET

Our web offset equipment are capable of performing considerably voluminous printing jobs from A to Z in a very short time. The web offset equipment of Huffle Group can print, fold, cut, bind and package 750 copies of a 32-page magazine or insert in 4 colors per minute. This rate corresponds to 45.000 copies per hour and 1.000.000 copies per day.

SHEET OFFSET

We are performed using a color sheet offset printing capacity of 55.000 copies per hour and 1.320.000 copies per day in a facility covering an indoor area of approximately 8.000 square meters.

DIGITAL PRINTING

Huffle Packaging has a professional digital printing center which provides services in digital sheetfed area called "digital offset" and indoor-outdoor advertising area. Recycled materials are extensively used wherever possible to reduce our

environmental footprint and we support this point of view by also purchasing from FSC Approved suppliers.
